### JUDGE HOLT MAY RUN.

*His Senatorial Candidacy Being Urged by Many Republicans.*

The friends of ex-Chief Justice William Peet are using his name in connection with the Senatorship, and Judge Holt himself is not talking about it, it is known that he would not decline the nomination.

It is regarded at Frankfort as almost certain that Judge Holt will be a candidate in the event Republicans have a majority on joint ballot, as he has already received many letters from prominent Republicans over the state urging him to make the race. Judge Holt was the first Republican elected to the Kentucky Court of Appeals Bench, and has long been known in Eastern Kentucky as a hard worker for his party.

The Republicans of Northern Kentucky are especially pleased with the prospect of Judge Holt's candidacy, and in the event of his success they will be immeasurably delighted.

### GAVE HIM THE MITTEN!

*Fleming County Girl Quietly Marries the Other Fellow.*

Ordinarily, especially at this season of the year, a present from a pretty girl of a pair of gloves is very acceptable; but when a fellow "gets the mittens" as this one did, it has a tendency to make him just a trifle too warm.

The Wilsons of the Tilton neighborhood was engaged to pretty Miss Lina Phillips of Martins Mills.

The wedding was set for Thursday afternoon.

Tuesday night Walker Call and Miss Phillips drove into Flemingsburg, hunted up the County Clerk, secured license and were married by J. L. Kendrick at the Clerk's office about 12 o'clock, and went on their way rejoicing.

Wednesday morning the groom—that was-to-be came into town to secure license, and his feelings may be imagined when he learned how matters stood.

# STILL DELVING.

The Work of Recovering Explosions Victims Goes On.

Rain Adds to the Gloom Around the Scene of Disaster at Detroit.

A Body Mangled Beyond Recognition, But Identified by the Clothing, Taken Out—All the Bodies Recovered—One Engineer Under Surveillance.

Detroit, Nov. 9.—Rain adds to the gloom around the scene of Wednesday's terrible explosion. The crowds have dwindled to a few hundred of the curious and the friends and relatives of the half dozen persons who are still counted among the missing. It rained nearly all night, but despite the almost steady downpour the men at work on the ruins of Davis & Co. established, No. 45 Larned street, kept steadily at work and by daylight every bit of wreckage had been cleared out and the basement floor was absolutely clean. By this time the walls of the Journal building, which had been at work began on the wreckage of building No. 47. It was still raining hard when the day shift came on duty, but the work did not stop for an instant. The shift comprised more than a hundred men and women, and the work which was fast disappearing.

To facilitate the work much of the wreckage of No. 47 is being thrown into the cellar of No. 34, and it will be only a few hours now when the bodies of the workers will be recovered. The bodies also will be laid to rest, the blame for the disaster fixed beyond all question. Late Thursday night a body of workers who were picking at the ruins of No. 47 uncovered the head of a girl whose body was pinned beneath the debris. She lay along the floor of the Journal building, was a pretty girl and was not disfigured.

George Ulrich, who was digging in the ruins ever since the accident occurred, looking for his sister Anna, who was employed at Hillers, was among the group which recovered the body. The boy recognized his sister immediately and his grief was awful. It was ten o'clock Friday morning before the girl's body could be gotten from underneath the heavy timbers. At 1:015 the workers recovered the leg of a man. He is believed to be heavy machinery, and it will be some hours before the body can be removed.

The body under the heavy machinery was recovered shortly after noon. It was crushed and mangled beyond all recognition, but identified by the clothing as that of Charles Linn.

With the exception of Anna O'Donnoughue, who is still in a critical condition all of the injured are doing well and will recover. Friday morning the prosecuting attorney ordered that Edward Thompson, editor in charge of the boilers of the Journal building, be kept under police surveillance. Thompson will be kept under surveillance until the cause of the boiler explosion has been thoroughly investigated. If he is well enough he will be taken to Central station, if not a policeman will be kept on duty at his bedside.

**FOURTH-CLASS POSTMASTERS.**  
The First Step Taken to Place Them Under a Service Tax.

WASHINGTON, Nov. 9.—The president Friday took the first step toward putting fourth-class postmasters in the classified service by amending civil service rules so that they will hereafter be paid.

"And whenever, by order of the postmaster general, any post office shall be consolidated with and made a part of another post office where free delivery is established, all the employees of such post office, whose names appear on the roster of said office approved by the post office department, and including the postmaster thereof, shall from the date of said order be employees of said free delivery office, and the post holding on the date of said order, the position of postmaster at the office thus consolidated with free delivery office, may be assigned to any position therein and given any appropriate designation under the classification act which the postmaster general may direct."

**Man and Wife Suffocated by Gas.**  
NEW YORK, Nov. 9.—A man named Busch and his wife Margie, both about 30 years old, were found dead Friday morning, having been suffocated by gas in the apartments of a Mrs. Hicks, at No. 305 East Sixty-ninth street. Mrs. Hicks was a friend of the unfortunate couple and gave them lodgings for the night.

**Stroke Spreading.**  
GLASGOW, Nov. 9.—The strike of engineers and others in the Clyde ship building yards is spreading and embraces all of the fitters and engineers now working. It is possible also that the dispute between the employers and employees may extend to the Thames, Tyne and Wear ship yards.

**New Copper Find.**  
CLARKSBURG, Tenn., Nov. 9.—Rich beds of copper and iron ore have been discovered on the plantation of George Bassett, in the hills 20 miles from this city. There is some gold contained in the ore, but it is not known whether there is sufficient to pay for the working.

**Drowned Himself.**  
CHARLESTON, W. Va., Nov. 9.—W. E. Gillison, aged 60 years, Friday morning walked to the water line at Barretts landing. The body had been lying there beside a large towboat ever since the river had been low. The cause of the fire is unknown. They are both boats of the Barretts line, and the loss will be permanent.

**Distinguished Surgeon Dead.**  
ATLANTA, Ga., Nov. 9.—A special from Rome, Ga., to the Constitution, says that Dr. Robert Battie died there Friday. Battie was one of the most distinguished surgeons in the world. He was the originator of the "Battie operation," which is performed over the world, and especially in Paris. He was born in Augusta, Ga., in 1824.

**Confederation in Cuba.**  
HAVANA, Nov. 9.—A dispatch received here from Mantanzas Friday says that a great fire occurred there Thursday night during which three stores and a number of houses were burned. The loss is estimated at \$100,000, not insured.

## ALLEN G. THURMAN.

The aged old紗士 of Boston's Dead, the Result of a Fall Last Friday.

COLUMBUS, O., Nov. 9.—Last Friday ex-Senator Allen G. Thurman fell from a sofa in his library and suffered injuries which left him which was very painful to him. He had been unable to stand on Saturday, and though he was better on Sunday, and it was believed that his strong constitution would enable him to stand the shock notwithstanding his great age. On Tuesday he went to the polls to vote, but at the advice of his physician he did not do so. Wednesday he was much worse and Thursday he fell into a stupor from which it is altogether likely that he will not recover. His son, Allen W. Thurman, said at 11 o'clock Friday that there was little ground to hope that he will live more than a few days and his death may occur at any time.

Allen Granberry Thurman was born in Lumberton, N.C., November 18, 1812, so that he will be 81 years old if he lives to next Wednesday. He was a traveling engineer, and after serving and working for Thurman, was mainly entrusted to his uncle, Gov. William Allen, and his boyhood and young manhood were spent in the service of the Gov. Allen. He studied law with his uncle, was admitted to the bar and from 1831 to 1835 was a member of the House of Representatives. In 1838 he was elected to the U. S. Senate, and in 1841 was appointed minister to Chile. While serving in this capacity he introduced and had passed the well known Thurman bill, which was adopted and recommended by the national democratic convention for vice-president on the ticket with Cleve Land. In 1844 he married Mary Dunn, of Kentucky, by whom he had three children—two daughters and a son. Mrs. Thurman died in 1861, but the three children survive.

## SATORI GIBSON

Gives His View on the Late Political Land-

CHICAGO, Nov. 9.—A Washington special says: Said Senator Gibson Friday, discussing the subject of his defeat:

"There has been no exaggeration in the statement that the fight was between Senator Thompson and myself. The Hurst was but an incident in the greater battle. The fight was between those who favored the Wilson bill and those who favored the senate bill right in changing the measure. But the senate bill would have been democratic and I would have been returned to the senate. I have suffered defeat more than anyone else. The people had it for their senators, and my head was up first, and, of course, it was hit. Senator Thompson is a good man, but he is strongly entrenched in the senate. He is inside the breastworks. He does not come up for re-election for two years, and before that time elapses the people of Maryland will flock to him like magpies to a scone, with feelings of created gratification and pride in him that they had when he saved the country from the Force bill."

CHICAGO, Nov. 9.—A Washington special says: The "wealthiest senator" arrived in Washington Friday. He is Wetmore, the successor of Senator Dixie. Senator Wetmore is temporarily at the Sherman, but has leased the mansion owned and formerly occupied by Vice President Morton, which the French government has been trying to purchase as a legacy to his son. He is preparing to give some magnificient entertainments the coming winter.

## TRADE REVIEW.

Dun & Co's Report of the Business of the Country.

Frick Controls Three-Fourths of the Coke Ovens in Connellsville District.

Wooden Mills Close to Water for Orders--The Market for Raw Cotton Held at 8.81 Cents--Stocks Have Declined--The Number of Failures

New York, Nov. 9.—R. G. Dun & Co.'s report says:

The liabilities of firms failing in October were \$16,179,536 against \$10,772,945 in five weeks last year, and \$24,054,626 in November. Failures for the week have been 269 in the United States against 161 last year and 49 in Canada against 42 last year.

It has been a broken week, and just before another after elections on the most important state's operations rarely have been so bad. The number of bankruptcies are weaker and there is some decrease in the number of establishments at work, both for reasons having nothing to do with questions of government. The purchase of competing interests in the mills of N. C. Frick, president of the iron and steel 269 coke ovens in the Connellsville region and practical control of more than three-quarters and an advance in the price of coke is expected.

The United States Leather Co., Third street, opposite Courthouse, has dropped its prices, finds outside concerns reducing prices of leather and has stopped production for sixty days. In order to control the market, Manufacturers have offered concessions ranging from five to ten cents per pound, only increasing the indisposition to buy.

Many woolen mills are closing to wait for orders, though the demand is fairly satisfactory for some dress goods and worsteds, and the Washington market is clear, though not at least in advance. But prices of these and most qualities of woolens are still unstable to manufacturers. The reaction from speculative prices of woolen goods abroad and the stability of spinning and weaving factories here reduced sales to \$5,623,545 pounds for the week against \$8,828,000 for the same week of 1892, but stocks of foreign wool here are very large. Cotton mills do well, as the halt and hesitation in cotton does not stop buying of goods, and many believe goods are in short supply, while others think it is not. The market for raw cotton is held at 8.81 cents, in spite of a highly respectable estimate of only 64,435,000 bales for the year.

Cotton stocks have declined an average of \$1.46 for railroads and \$1.77 for trusts during the week, with an obvious cause in fears of gold exports and serious financial anxieties abroad, especially at Paris. A coming congress and present tangible effect affect sugar, tobacco, cotton and other products. The market for October is for the United States alone \$46,705,654, 8.6 per cent over last year's, but, in spite of larger mileage, 2.4 per cent less than in 1892 on the same roads, and the comparison for the third and fourth week was less favorable.
